

# Theatres & Decontamination Conference

*Regulations and Standards Updates and Improvements in Practice*

Wednesday 14th March 2018, Marriot Forest of Arden, Warwickshire

*The event programme has been built around subjects suggested by healthcare personnel. The day will touch on subjects Theatre and Decontamination Managers need to know but have little time to research, study or review during their daily roles.*

*“Very interesting & varied content. Good for networking with others. Good for seeing different companies & discussing areas that you may not have normally thought of.”*

Donna Robinson, Theatre Manager,  
Northampton General Hospital

**Why Attend?** Whether you are concerned about the threat of cyber security to your medical devices, or you want to know what happens at the MHRA, this conference should have something that managers can walk away with. We will find out where the 5 micrograms protein detection limit came from, and look at case studies from hospitals trying new systems to improve efficiency in Theatres.

Delegates will have the opportunity to Network with industry colleagues, which has proven to be a good tool to gain new viewpoints, innovation, trouble shooting and efficiency savings.

You can tailor the day to suit you with breakout sessions and there will also be access to an exhibition during break times which will allow technical staff to have in-depth discussions with a large number of suppliers in a relaxed atmosphere.

*“Really well organised with a broad range of detail. I look forward to building on success.”*

Joann Hall, Care Group Manager,  
University Hospital Southampton

**Interested?** Please contact Gemma Aitchison for details or to secure your place: [gemma.aitchison@npag.eastamb.nhs.uk](mailto:gemma.aitchison@npag.eastamb.nhs.uk)
